

Here is a step by step, on how to change the receiver's channel to a Good channel,

1. Turn down the mic wall volume
2. Turn off the transmitter pack
3. Go to the receiver in the amp rack and hit "Set" then arrow up to squelch.
4. Hit "Set" then arrow down to low squelch, then hit "Set" to store.
5. Arrow up to "Easy Set Up" Then hit "Set"
6. Arrow up to "Scan New List" Then hit "Set"
7. As the receiver is scanning, look at the RF meter for movement.
8. The receiver will automatically give you the best bank when it's done scanning.
9. Hit "Set" to move into the bank
10. Use the arrow up and down to choose a channel that has No RF movement.
11. Once you find a good channel with no RF movement, Hit "Set" to store!
12. Arrow back to "Exit" and then hit "Set", Go to Squelch, and hit "Set" arrow up to Middle squelch
13. Hit "Set" to store (Middle) Squelch.
14. Arrow to Exit once more then hit "Set" to go to the home screen.
15. Turn on your body pack, Hit "Set" Then arrow up to advanced settings and hit "Set"
16. Arrow up to "Tune" hit "Set" match the first three numbers with the receiver's channel and hit "Set"
17. Match the next three numbers and hit "Set" to store!
18. Scroll or arrow to "exit" then hit set to get back to the home screen
